

VILLAS SATELLITE DISH COORDINATION FORM
Application for Villas Landscape Committee Approval

Date _____ Unit No. _____ Lot No. _____

Applicant _____ Phone _____

Address _____

A Satellite Dish Coordination Form must be submitted to the Villas Landscape Committee representative **PRIOR TO DISH INSTALLATION**. Contact Ted Johnson at 825-5746 or teddy1putt@gmail.com.

The proposed installation must be as unobtrusive as possible. It should not be visible from neighboring properties, golf courses or streets and should be no higher than 48” above landscape grade level. The location should be in the back or side yard, according to Villas Architectural Rules, Landscaping Regulations and Guidelines .

Locations that are prohibited are on top of the patio roof or on the tile roof. It is preferred that the dish not be attached to the villa at a point higher than 48” above landscape grade level unless written verification is presented stating that a good quality signal can not be obtained from the “preferred” locations. A good faith effort must be made to conceal the satellite dish.

The dish and its mounting hardware must be painted to match the villa within 30 days. The correct paint is available at Ace Hardware.

The Villas Landscape Committee will verify the satellite dish installation after completion. Final approval is based on the above guidelines. The dish may need to be moved if it is not in compliance.

I agree to the above guidelines Signed _____

Approved _____ Date _____
